

## COST OF ATTENDANCE POLICY

In determining a student's cost of attendance budget Continental School of Beauty will utilize census data obtained through a survey of current students at each location. The items that make up a student's cost of attendance are used to determine eligibility for Title IV grant and loan funds.

The following categories are considered when establishing each students cost of attendance:

- Tuition and fees
- Books, supplies and equipment
- Food and housing
- Transportation
- Miscellaneous personal expenses
- Direct loan origination fees

The average monthly indirect costs of food, housing, transportation and miscellaneous expenses are multiplied by the number of months needed to complete the student's program of study. This amount is added to the direct costs of attending school: tuition, fees, books, supplies, and loan fees. Together these amounts determine the student's total cost of attendance.
